

WealthCoin Development Roadmap

Internal Ecosystem Roadmap (Current Vision)

This roadmap reflects the current planned order of ecosystem development. As with any software project, timelines and features may evolve based on development progress, testing, security reviews, and community needs.

Phase 1 — Genesis Presale

The Genesis Presale serves as the foundation of the WealthCoin ecosystem.

Primary objectives include:

- Growing the founding community.
- Completing public token distribution.
- Continuing educational outreach.
- Preparing infrastructure for post-presale features.
- Establishing long-term transparency and trust.

Phase 2 — Utility Launch

Target: Approximately two weeks after the conclusion of the Genesis Presale.

WealthCoin Staking

The first major ecosystem utility is planned to be staking.

Objectives include:

- Rewarding long-term participation.
- Encouraging ecosystem engagement.
- Providing additional utility beyond simply holding WTC.
- Beginning the transition toward a more active ecosystem.

WealthCoin Academy

Launching alongside staking, the Academy will begin with its first educational lesson while expanding over time.

Initial focus areas include:

- Wallet safety
- Blockchain fundamentals
- Biblical stewardship
- Cryptocurrency security
- Responsible participation within the ecosystem

The Academy is intended to become one of WealthCoin's primary long-term educational initiatives.

Phase 3 — Transparency Center

Following the initial utility launch, WealthCoin plans to introduce a Transparency Center.

The objective is to allow community members to independently verify key organizational information directly on-chain.

Planned transparency features include:

- Treasury wallet
- Treasury WTC balance
- Treasury POL balance
- PolygonScan links
- Staking statistics
- Additional organizational transparency tools as the ecosystem grows

The Transparency Center is intended to provide visibility into organization-controlled assets while respecting the personal financial privacy of individual contributors and founders.

Phase 4 — Marketplace & Community

Target: Approximately four weeks after the Genesis Presale (subject to development readiness).

WealthCoin Community Hub

The Community Hub is envisioned as a place for meaningful discussion centered around stewardship, education, encouragement, and respectful collaboration.

Rather than focusing solely on market activity, the goal is to cultivate a community that reflects WealthCoin's mission and values.

The planned first community post is simple:

“Prayer Requests?”

This represents the type of environment WealthCoin seeks to foster from the beginning.

WealthCoin Marketplace

The Marketplace is planned as an ecosystem where goods, services, educational resources, and other approved offerings may eventually be listed using WealthCoin.

Initial marketplace listings will likely consist of official WealthCoin resources while additional functionality and community participation are introduced over time.

Long-term possibilities include:

Educational resources

Digital products

Professional services

Event registrations

Organization-approved marketplace listings

Future Development

Following these foundational phases, future development may include:

- Expanded Academy curriculum
- Governance participation
- Marketplace growth
- Additional staking features
- Ecosystem partnerships
- Mobile enhancements
- International initiatives
- Continued educational expansion
- Additional blockchain integrations where appropriate

Guiding Philosophy

Rather than attempting to launch every feature simultaneously, WealthCoin intends to grow in deliberate stages. Each release is designed to build upon the previous one, prioritizing stability, education, transparency, and long-term sustainability over rapid expansion.

This roadmap represents the current direction of the project and may evolve as development progresses, feedback is received, and new opportunities arise.
